

## Library

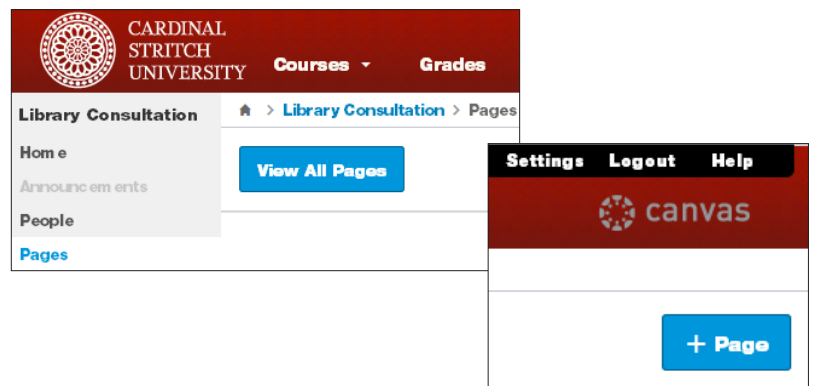

### In the Films on Demand database

1. After finding the video you wish to embed, click the **Embed** link found under the player window
2. Choose a size for the embedded player by using the **Video Size** dropdown menu
3. Click within the white colored **Alternate Embed Code (Best for Public Pages) - (Segment)** box to select the embed code for the current clip.
4. Copy the selected code (Ctrl+C).
5. This code will be pasted into a new webpage or into an existing webpage.

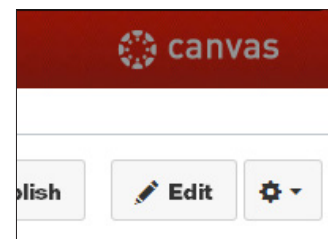

### Creating a new webpage in the Canvas LMS

1. Within a course, choose **Pages** in the left navigation menu
2. Click the blue **View all pages** button
3. Click the blue **+Page** button to create a new page
4. A new page will be created and opened for adding content

### Edit an existing webpage in the Canvas LMS

1. In the left navigation menu, choose **Pages**
2. Choose the blue **View all pages** button
3. Choose the webpage you wish to edit by clicking on the page title
4. Click the **Edit** button

### Embed a Films on Demand clip in the Canvas LMS

1. Create a new webpage or edit an existing webpage
2. Choose the **HTML Editor** link on the upper right side of the window
3. Place your cursor within the HTML at the position you wish to have the video player appear
4. Paste the copied code into the HTML window (Ctrl+V)
5. Click the blue **Save** button
6. The video player should appear within the webpage
